ADDITIONAL INFORMATION TO ACCOMPANY TERMS & CONDITIONS . 24
Terms and Conditions of AHRC Knowledge Transfer Fellowship awards

The following are additional terms and conditions applicable to AHRC Knowledge Transfer Fellowship awards and as such reflect the particular nature of the scheme. They should be read in conjunction with the common Terms and Conditions of Research Council Grants which follow below.

The AHRC holds a contractual relationship with the HEI, and the responsibilities of the HEI are detailed in the common Terms and Conditions of Research Council Grants. Awards are made to the HEI rather than the successful applicant as an individual.

By submitting a letter of support the non-academic partner/s also commit to the identified project. This commits the non-academic partner/s to:

• Committing all reasonable resources as outlined in the application to ensure the successful completion of the project;
• Making payments if agreed with the HEI to the HEI;
• Any other commitments relating to the non-academic partner as specified in the application.

Terminology

References to research projects and activities apply in this scheme to the programme of Knowledge Transfer.

GC 5 Changes in Research Project (technical aspects)

In addition to the restrictions outlined in the Terms and Conditions of Research Council Grants (GC5 Changes in Research Project), it is the Principal Investigator’s responsibility to ensure that any output in electronic form is prepared in accordance with best practice.

GC 19 to replace Sanctions

If the ‘final’ report or the final expenditure statement is not received within three months of the end date of the award, the AHRC may:

- Bar the investigator from making any further applications to any of the AHRC award schemes until the report is received.
- Seek to recover the grant in full.
Keep a record of the failure to submit on time and take this into consideration when the investigator makes further applications to the AHRC.

**GC 23 Publication and Acknowledgement of Support**

In addition to the conditions outlined in Terms and Conditions of Research Council Grants (RG23 Publication and Acknowledgement of Support), one copy of any publication or public output (CD-ROM, video etc) should be sent to the AHRC. Where the research programme results in a non-permanent output, such as an installation or performance, photographs, recordings and reviews may constitute an acceptable record of the output.
Terms and Conditions of AHRC awards

Below are the common terms and conditions for grants made by the Research Councils. These should be read in conjunction with the relevant scheme-specific annex (also below).

TERMS AND CONDITIONS OF RESEARCH COUNCIL fEC GRANTS

These terms and conditions relate to grants, comprising Research Grants and Fellowships, costed and funded on the basis of full economic costs (fEC), calculated in accordance with the TRAC methodology (universities and other higher education bodies) or by an equivalent methodology by other Research Organisations.

Grants awarded by the Research Councils are made to Research Organisations on the basis of this single set of core terms and conditions. The Research Councils are:

- Arts and Humanities Research Council (AHRC)
- Biotechnology and Biological Sciences Research Council (BBSRC)
- Economic and Social Research Council (ESRC)
- Engineering and Physical Sciences Research Council (EPSRC)
- Medical Research Council (MRC)
- Natural Environment Research Council (NERC)
- Science and Technology Facilities Council (STFC)

Individual Councils may add additional conditions to the grant to reflect the particular circumstances and requirements of their organisation, or the nature of a particular grant. Acceptance of a grant constitutes acceptance of both the core conditions and any additional conditions.

The Research Councils reserve the right to vary these terms and conditions.

Definitions

**Research Council**: any of the bodies listed above.

**Grant**: support for a proportion of the full economic costs of a project. A Grant may be either a Research Grant or a Fellowship.

- Research Grant: a contribution to the costs of a stated research project which has been assessed as suitable for funding through the procedures established by the relevant Research Council.

- Fellowship Grant: an award made through a fellowship competition providing a contribution to the support of a named individual. It covers the
cost of the time dedicated by the fellow to their personal research programme, and may or may not include research support costs.

**Grant Holder**: the person to whom the grant is assigned and who has responsibility for the intellectual leadership of the project and for the overall management of the research. The Grant Holder is either the Principal Investigator (in the case of a Research Grant) or a Research Fellow (in the case of a Fellowship Grant)

**Co-Investigator**: a person who assists the Grant Holder in the management and leadership of a project.

**Research Organisation**: the organisation to which the grant is awarded and which takes responsibility for the management of the research project and the accountability of funds provided.

**Full Economic Costs (fEC)**: a cost which, if recovered across an organisation’s full programme, would recover the total cost (direct, indirect and total overhead) including an adequate recurring investment in the organisation’s infrastructure.

**Directly Incurred Costs**: costs that are explicitly identifiable as arising from the conduct of a project, are charged as the cash value actually spent and are supported by an audit record.

**Directly Allocated Costs**: the costs of resources used by a project that are shared by other activities. They are charged to projects on the basis of estimates rather than actual costs and do not represent actual costs on a project-by-project basis.

**Indirect Costs**: non-specific costs charged across all projects based on estimates that are not otherwise included as Directly Allocated Costs. They include the costs of the Research Organisation’s administration such as personnel, finance, library and some departmental services.

**Exceptions**: Directly Incurred Costs that Research Councils fund at 100% of fEC, subject to actual expenditure incurred, or items that are outside fEC.

**Transparent Approach to Costing (TRAC)**: an agreed methodology used by universities and other higher education bodies for calculating full economic costs.

**Funding Assurance Programme**: a programme of visits and office-based tests to seek assurance that grant funds are used for the purpose for which they are given and that grants are managed in accordance with the terms and conditions under which they are awarded.

**Data Protection Regulations**

The Research Councils will use information provided on the grant proposal for processing the proposal, the award of any consequential grant, and for the payment, maintenance and review of the grant. This may include:

- Registration of proposals;
- Operation of grants processing and management information systems;
- Preparation of material for use by referees and peer review panels;
- Administration, investigation and review of grant proposals;
Sharing proposal information on a strictly confidential basis with other funding organisations to seek contributions to the funding of proposals;
Statistical analysis in relation to the evaluation of research and the study of trends;
Policy and strategy studies.

To meet the Research Councils’ obligations for public accountability and the dissemination of information, details of grants may also be made available on the Research Councils’ web sites and other publicly available databases, and in reports, documents and mailing lists.

After completion of the grant, the Research Council may contact the Grant Holder concerning funding opportunities or events, or for the purposes of evaluation. In some instances, the Research Council may wish to authorise an affiliate organisation to contact the Grant Holder on its behalf. It is assumed that, by agreeing to these terms and conditions, the Research Organisation consentsto this on behalf of the Grant Holder, but if the Grant Holder prefers not to be contacted in this way, he or she should state this to the Research Council. Grant Holders may choose to opt out at any point, provided they comply with all other terms and conditions associated with the grant.

**Freedom of Information Act and Environmental Information Regulations**

Attention is drawn to the provisions of the Freedom of Information Act 2000 (FOIA) and the Environmental Information Regulations (EIRs). Research Councils have issued Publication Schemes which set out the types of information publicly available on their websites or published as documents. In addition, Research Councils have an obligation to respond to specific requests and may be required to disclose information about or provided by Research Organisations. In some cases the Research Council may consult the Research Organisation before disclosure, but it is under no obligation to do so. If a Research Organisation considers that any information it provides to a Research Council would be subject to an exemption under FOIA or the EIRs it should clearly mark the information as such and provide an explanation of why it considers the exemption applies and for how long. The Research Council will consider this explanation before disclosure, but it is not obliged to accept it as binding.

Where a Research Council determines that a Research Organisation is holding information on its behalf that it requires in order to comply with its obligations under FOIA or EIRs, the Research Organisation undertakes to provide access to
such information as soon as reasonably practicable on request of the Research Council and in any event within 5 working days.

In some cases Research Organisations may be directly responsible for complying with FOIA and the EIRs; in such cases the Research Councils accept no responsibility for any failure to comply by the Research Organisations.

**GC 1 Responsibilities of the Research Organisation**

- The Research Organisation must ensure that any part of the Full Economic Cost of the project not funded by the Research Council grant is committed to the project before it starts.
- The Research Organisation must ensure that the Grant Holder and Co-Investigators are made aware of their responsibilities and that they observe the terms and conditions of grants.
- The Research Organisation must ensure that the research supported by the grant complies with all relevant legislation and Government regulation, including that introduced while work is in progress. This requirement includes approval or licence from any regulatory body that may be required before the research can commence.
- The Research Organisation is expected to adopt the principles, standards and good practice for the management of research staff set out in the 2008 Concordat to Support the Career Development of Researchers, and subsequent amendments [www.researchconcordat.ac.uk](http://www.researchconcordat.ac.uk). The Research Organisation must create an environment in which research staff are selected and treated on the basis of their merits, abilities and potential. It must ensure that reliable systems and processes are in place so that the principles of the Concordat are embedded into practice within the Research Organisation. It must ensure compliance with all relevant legislation and Government regulation, including any subsequent amendments introduced while work is in progress.
- The Research Organisation must appoint a Research Fellow as an employee for the full duration of the award.
- The Research Organisation must integrate the Research Fellow within the research activities of the host department, whilst ensuring that he or she is able to maintain independence and focus on their personal research programme.
- The Research Organisation must notify the Research Council of any change in its status, or that of the Grant Holder, that might affect the eligibility to hold a grant.
- The Research Organisation must ensure that the requirements of the Employing Organisation under the Department of Health’s Research Governance Framework for Health and Social Care (or equivalent) are met for research involving NHS patients, their organs, tissues or data, and that the necessary arrangements are in place with partner
organisations. Where it also accepts the responsibilities of a Sponsor (as defined in the Governance Framework), it must also ensure that the requirements for Sponsors are met.

- The Research Organisation must ensure proper financial management of grants and accountability for the use of public funds.

**GC 2 Research Governance**

It is the responsibility of the Research Organisation to ensure that the research is organised and undertaken within a framework of best practice that recognises the various factors that may influence or impact on a research project. Particular requirements are to ensure that all necessary permissions are obtained before the research begins, and that there is clarity of role and responsibility among the research team and with any collaborators. The Research Councils expect research to be conducted in accordance with the highest standards of research integrity and research methodology.

**Research Ethics**

The Research Organisation is responsible for ensuring that ethical issues relating to the research project are identified and brought to the attention of the relevant approval or regulatory body. Approval to undertake the research must be granted before any work requiring approval begins. Ethical issues should be interpreted broadly and may encompass, among other things, relevant codes of practice, the involvement of human participants, tissue or data in research, the use of animals, research that may result in damage to the environment and the use of sensitive economic, social or personal data.

**Use of Animals in Research**

Wherever possible, researchers must adopt procedures and techniques that avoid the use of animals. Where this is not possible, the research should be designed so that:

- The least sentient species with the appropriate physiology is used;
- The number of animals used is the minimum sufficient to provide adequate statistical power to answer the question posed;
- The severity of procedures performed on animals is kept to a minimum. Experiments should be kept as short as possible. Appropriate anesthesia, analgesia and humane end points should be used to minimise any pain and suffering.
The provisions of the Animals (Scientific Procedures) Act 1986, and any amendments, must be observed and all necessary licences must have been received before any work requiring approval takes place.

**Medical and Health Research**

The Research Organisation is responsible for managing and monitoring the conduct of medical and health research in a manner consistent with the Department of Health’s Research Governance Framework for Health and Social Care (or equivalent). There must be effective and verifiable systems in place for managing research quality, progress and the safety and well-being of patients and other research participants. These systems must promote and maintain the relevant codes of practice and all relevant statutory review, authorisation and reporting requirements.

Research involving human participants or data within the social sciences that falls outside the Department of Health’s Research Governance Framework must meet the provisions and guidelines of the ESRC’s Research Ethics Framework. While this research may involve patients, NHS staff or organisations, it is defined as research that poses no clinical risk or harm to those who are the subjects of research. Research Organisations must ensure that appropriate arrangements are in place for independent ethics review of social science research that meets local research ethics committee standards.

Significant developments must be assessed as the research proceeds, especially those that affect safety and well-being, which should be reported to the appropriate authorities and to the Research Council. The Research Organisation must take appropriate and timely action when significant problems are identified. This may include temporarily suspending or terminating the research.

The Research Organisation is responsible for managing and monitoring statutory requirements for which it accepts responsibility, for example, in relation to legislation on clinical trials, use of human organs, tissues and data.

Guidance by the MRC on the conduct of medical research, and by ESRC on the conduct of social science research, provided on behalf of all Research Councils, must be observed.

**Health and Safety**
The Research Organisation is responsible for ensuring that a safe working environment is provided for all individuals associated with a research project. Its approach and policy on health and safety matters must meet all regulatory and legislative requirements and be consistent with best practice recommended by the Health & Safety Executive. Appropriate care must be taken where researchers are working off-site. The Research Organisation must satisfy itself that all reasonable health and safety factors are addressed. The Research Councils reserve the right to require the Research Organisation to undertake a safety risk assessment in individual cases where health and safety is an issue, and to monitor and audit the actual arrangements made.

**Misconduct and Conflicts of Interest**

The Research Organisation is required to have in place procedures for governing good research practice that meet the requirements of the Research Councils’ guidance on good practice. The Research Organisation must ensure that there are reliable systems and processes in place for the prevention of research misconduct e.g. plagiarism, falsification of data, together with well-defined and clearly-publicised arrangements for investigating and resolving allegations of misconduct. Where an allegation of misconduct arises in respect of a researcher supported by a research grant, the Research Council must be informed immediately and notified of the outcome of any investigation.

The Research Organisation must ensure that potential conflicts of interest in research are declared and subsequently managed.

**GC 3 Use of Funds**

Subject to the following conditions, grant funds may be used, without reference to the Research Council, in such a manner as to best carry out the research. Grant funds include a provision for inflation based on the GDP Deflators published by HM Government. The value of the grant may be varied by the Research Council during the lifetime of the grant in accordance with the deflators or to take into account any other Government decisions affecting the funding available to the Research Councils. Grant funds are provided for a specific research project. Under no circumstances may Directly Incurred and Exceptions funds be used to meet costs on any other grant or activity.

Grant funds cannot be used to meet the costs of any item where the activity falls outside the period of the grant, e.g. when travel falls outside the grant period,
the costs cannot be charged to the grant even if the tickets, etc. can be purchased in advance.

Any proposal to purchase an item of equipment in the last 6 months of the grant is subject to prior written approval by the Research Council. The Research Council will wish to be assured that the item of equipment is essential to the research.

**GC 4 Starting Procedures**

The start date shown on the starting certificate will be regarded as the start date of the grant. Submission of the starting certificate will also constitute acceptance of the grant, if no other acceptance procedure exists. The start of research may be delayed by up to 6 months (AHRC and ESRC 3 months) from the start date shown in the award letter, the duration of the grant remaining unchanged. The grant may lapse if it is not started within this period. Submission of the starting certificate is required not more than 42 days after the start date.

Where there are staff funded by the grant who were intended to be appointed from the start date, payments will take effect from the date when the first such staff start work. Otherwise, payments will take effect from the start date given on the starting certificate.

Expenditure may be incurred prior to the start of research and subsequently charged to the grant, provided that it does not precede the date of the award letter.

**GC 5 Changes in Research Project**

The Research Council must be consulted in the event of any major change in the proposed research, including failure to gain access to research facilities and services, or to gain ethical committee approval for the research, particularly those which make it unlikely that the objectives of the research can be achieved. If appropriate, revised proposals may be required. The Research Council reserves the right to make a new grant in place of the existing grant, or to revise, retain or terminate the existing grant.

It is the responsibility of the Research Organisation to manage the resources on the grant, including the staff, and the Research Council need not be consulted if staffing levels on the grant are changed. However, a proportionate reduction should be made in the value of Estates, Indirect Costs and Infrastructure Technicians claimed by the Research Organisation in the following circumstances:
1. a post that attracts these costs is not filled;
2. a staff member who attracts these costs leaves more than six months before the end of the period for which the post was funded and is either not replaced, or is replaced by a category of staff that does not attract the costs e.g. project student or technician.

**GC 6 Transfers of Funds between Fund Headings**

Transfers of funds between fund headings are permitted only within and between Directly Incurred costs and Exceptions. Transfers will be at the rate applicable for the heading, as set out in the award letter. Funds can only be transferred and used to meet the cost of activity or activities that meet the agreed aims and objectives of the project. While approval does not need to be sought from the Research Council for transfer of funds, the Research Councils reserve the right to query any expenditure outlined in the Final Expenditure Statement, which has not been incurred in line with the Grant Terms and Conditions.

**GC 7 Extensions**

**Research Grants:** After a research grant has started, the duration may be extended by a total of up to 6 months, subject to prior written approval. Extensions may cover breaks or delays in the appointment of staff, periods of maternity leave, paternity leave, adoption leave, parental leave, extended jury service or paid sick leave exceeding 3 months (or possibly shorter periods of sick leave if the member of staff is disabled for the purposes of the Disability Discrimination Act 1995 (as amended)), or other exceptional circumstances with the agreement of the Research Council.

**Fellowship Grants:** After a fellowship grant has started, the duration may be extended to cover maternity leave, paternity leave, adoption leave, parental leave, extended jury service or paid sick leave for a Research Fellow in line with the terms and conditions of the fellow’s employment. For staff other than the fellow extensions may cover breaks or delays in the appointment of staff, periods of maternity leave, paternity leave, adoption leave, parental leave, extended jury service or paid sick leave exceeding 3 months (or possibly shorter periods of sick leave if the member of staff is disabled for the purposes of the Disability Discrimination Act 1995 (as amended)), or other exceptional circumstances with the agreement of the Research Council.

A written request for an extension should be made as soon as the requirement is identified and subject to prior written approval confirmed when the period
required is known. All requests for extensions must be made before the grant ends.

**GC 8 Staff**

The Research Organisation must assume full responsibility for staff funded from the grant and, in consequence, accept all duties owed to and responsibilities for these staff, including, without limitation, their terms and conditions of employment and their training and supervision, arising from the employer/employee relationship.

The Research Organisation must provide research staff with a statement, at the outset of their employment, setting out the provisions for career management and development, including personal skills training, and ensure that they have access to appropriate training opportunities.

Provided it is related to the research project on which they are currently working, Research staff and Research Fellows may, during normal working hours, undertake teaching and demonstrating work, including associated training, preparatory, marking and examination duties, for up to an average of 6 hours a week (pro rata for part-time staff) **calculated over the period** that they are supported on the grant.

**GC 9 Maternity, Paternity and Adoption Pay and Leave**

Grant funds may be used for maternity, paternity and adoption pay for staff within the Directly Incurred and Exceptions fund headings (excluding the Principal and Co-Investigators, unless they are also Research Fellows or Research Assistants funded by the grant), if staff fulfill the qualifying conditions of the Research Organisation.

Maternity, paternity and adoption pay is not payable by the Research Council for staff acting as Principal and Co-Investigators (unless they are also Research Fellows or Research Assistants funded by the grant), nor to other staff not dedicated to the project nor paid from Directly Incurred or Exceptions funds.

The Research Organisation will be compensated at the end of the grant to cover the additional costs of either a substitute appointment or an extension of the grant from maternity, paternity or adoption leave. The salary of any substitute appointment must not exceed that of the individual on leave. The duration of a grant will be extended only if the period can be accommodated within the
maximum period allowed for extensions. Directly Allocated and Indirect funds will not be increased as a result of such extensions.

**Research Grants:** Research Grant funds may be used to provide paid maternity, paternity and adoption leave only to the extent that it is taken during the original period of the grant. The Research Organisation will be responsible for any liability for maternity, paternity and adoption leave pay for staff supported by the grant outside the original period of the grant. If, for example, a grant ends while a member of research staff is part-way through her maternity leave, the Research Organisation will be responsible for that part of the maternity leave which is taken after the research grant has ended.

**Fellowship Grants:** Fellows are entitled to take maternity, paternity, adoption or parental leave in accordance with the terms and conditions of the fellow’s employment. If requested, consideration will be given to allowing a fellowship grant to be placed in abeyance during the absence of the Research Fellow for maternity, paternity, adoption or parental leave, and the period of the fellowship extended by the period of leave. Consideration will be given to requests to continue the fellowship on a flexible or part-time basis to allow the Research Fellow to meet caring responsibilities.

**GC 10 Sick Leave**

Grant funds may be used for paid sick leave for staff within the Directly Incurred and Exceptions fund headings (excluding the Principal and Co-Investigators, unless they are also Research Fellows or Research Assistants funded by the grant) who fulfil the qualifying conditions of the Research Organisation.

Sick pay is not payable by the Research Council for staff acting as Principal and Co-Investigators (unless they are also Research Fellows or Research Assistants funded by the grant), nor to other staff not dedicated to the project nor paid from Directly Incurred or Exceptions funds.

The Research Organisation will be compensated at the end of the grant for any additional costs or time resulting from sick leave, falling within the original period of the grant. The duration of a grant will be extended only if the period can be accommodated within the maximum period allowed for extensions. Directly Allocated and Indirect funds will not be increased as a result of such extensions.

**Research Grants:** Where there is a continuous period of sick leave in excess of 3 months, the Research Organisation may apply to the Research Council to discuss
the possibility of a substitute appointment to safeguard progress on the project. Where a Research Assistant has been on sick leave in excess of 3 months, the Research Organisation must comply with all their obligations to consider reasonable adjustments before making a substitute appointment. Where a Research Assistant has been on sick leave for an aggregate (not necessarily continuous) period in excess of 3 months, where this is due to a single condition or a series of related conditions, the Research Organisation may request an extension to the duration of the project.

**Fellowship Grants:** Fellows are entitled to take sick leave in accordance with the research organisation’s terms and conditions. If requested, consideration will be given to allowing a fellowship grant to be placed in abeyance during the absence of the Research Fellow due to sick leave, and the period of the fellowship extended by the period of sick leave. The additional salary costs for the fellow (pro rata to their percentage FTE on the fellowship) should be claimed, as necessary, at the end of the extended period.

**GC 11 Procurement of Equipment**

The procurement of equipment, consumables and services, including maintenance, must comply with all relevant national and EU legislation and the Research Organisation’s own financial policy and procedures. Accepted procurement best practice in the higher education sector must be observed. For all equipment and services where the contract value is more than £25,000, excluding VAT, professionally qualified procurement staff must be consulted before the procurement process begins, and, where appropriate, at the market research stage, and must approve the order/contract before it is placed with a supplier.

**GC 12 Ownership and Use of Equipment**

Equipment purchased from grant funds is primarily for use on the research project for which the research grant was awarded, and belongs to the Research Organisation. In certain circumstances the Research Council may wish to retain ownership throughout the period of the grant and possibly beyond. In such cases, the grant will be subject to an additional condition.

The Research Council must be informed if, during the life of the research grant, the need for the equipment diminishes substantially or it is not used for the purpose for which it was funded. The Research Council reserves the right to determine the disposal of such equipment and to claim the proceeds of any sale.
Any proposal to transfer ownership of the equipment during the period of the grant is subject to prior approval by the Research Council. After the research project has ended, the Research Organisation is free to use the equipment without reference to the Research Council, but it is nevertheless expected to maintain it for research purposes as long as is practicable.

Where there is spare capacity in the use of the equipment, the Research Council expects this to be made available to other users. Priority should be given to research supported by any of the Research Councils and to Research Council-funded students.

**GC 13 Transfer of a Grant to another Research Organisation**

The Research Organisation must notify the Research Council if the Grant Holder intends to transfer to another organisation. If this organisation is eligible to hold grants, and is able to provide a suitable environment to enable the project to be successfully completed, the expectation is that the grant would be transferred with the Grant Holder. Written agreement to this is required from both the relinquishing and receiving organisations.

The Research Council will wish to be assured that satisfactory arrangements have been agreed that will enable the project to be undertaken, or to continue, in accordance with its research objectives. If suitable arrangements cannot be agreed, the Research Council will consider withdrawing its support or terminating the grant.

Where there is a basis for continuing involvement by the relinquishing organisation, agreement should be reached between both organisations on the apportionment of work and the distribution of related funding.

Grants will not be re-costed following transfer. The unspent balance of Directly Incurred and Exceptions, together with a pro rata share of Directly Allocated and Indirect costs, will be transferred to the new Research Organisation. The receiving organisation will be required to confirm, by return of a starting certificate, that it will provide any balance of resources needed to complete the project.

**GC 14 Change of Grant Holder**

**Research Grants:** The Research Organisation must consult the Research Council if it is proposed to change the Grant Holder, for example, following retirement or
resignation. Where the Grant Holder is transferring to another organisation eligible to hold a grant, the provisions of GC 13 will apply. In other circumstances, the Research Organisation may nominate a replacement Grant Holder. The Research Council will wish to be assured that the replacement meets the eligibility criteria and has the expertise and experience to lead the project to a successful conclusion, in accordance with its research objectives.

**Fellowship Grants:** A fellowship grant is awarded on the basis of a named individual’s suitability to undertake and benefit from the period of research: therefore changes to the Grant Holder are not permitted. The resignation of the Research Fellow, or the termination of their employment, constitutes the end of the grant for the purpose of submitting a final report and the Council’s financial liabilities.

**GC 15 Annual Statement**

The Research Organisation may be sent a statement to return each year showing payments made by the Research Council during the previous financial year for all the grants it holds. Where a statement is required, the Research Organisation must certify, by returning the statement, that:

- expenditure has been incurred in accordance with the grant conditions, and
- those grants shown as current are continuing.

No further payments will be made until the annual statement has been received and accepted by the Research Council.

**GC 16 Expenditure Statements**

The Research Organisation must complete and return an expenditure statement within 3 months of the end date of a grant. Once an expenditure statement has been received and the expenditure incurred has been reconciled against payments made, it will be considered as final.

Expenditure shown in the Directly Incurred and Exceptions headings must show the actual expenditure incurred by the project. Settlement by the Research Council will reflect the proportion of fEC stated in the award letter applied to actual expenditure, within the cash limit.

For the Directly Allocated and Indirect Costs headings, the Research Council will pay the amount shown as spent, within the cash limit, provided that the grant ran
its full course. Where a grant is terminated more than 6 months before the
planned end date, a pro rata share will be paid. Where a grant terminates within
6 months of the planned end date, estates and Indirect Costs will be paid in full,
but Investigators’ costs and Other Directly Allocated Costs will be paid pro rata.

Costs arising from maternity, paternity, adoption or sick leave should be
identified in the Absence heading of the statement.

The Research Council reserves the right to require the Research Organisation to
complete and submit a statement of expenditure at any time during the course of
a grant, or to provide supplementary information in support of an interim or final
expenditure statement.

**GC 17 Inspection**

The Research Council reserves the right to have reasonable access to inspect the
records and financial procedures associated with grants or to appoint any other
body or individual for the purpose of such inspection.

The Research Organisation must, if required by the Research Council, provide a
statement of account for the grant, independently examined by an auditor who is
a member of a recognised professional body, certifying that the expenditure has
been incurred in accordance with the research grant terms and conditions.

Research Councils will undertake periodic reviews of Research Organisations
within the **Funding Assurance Programme** to seek assurance that grants are
managed in accordance with the terms and conditions under which they are
awarded.

**GC 18 Final Report**

A report on the conduct and outcome of the project must be submitted by the
Research Organisation within three months of the end of the grant, on the form
provided. No further application from a Grant Holder will be considered while a
final report is overdue.

If there are exceptional reasons that will prevent submission of the final report
within the period allowed, a written request may be made, before the due date
passes, for the submission period to be extended.
GC 19 Sanctions

The Research Councils reserve the right to impose financial sanctions where they identify areas of non-compliance in relation to the terms and conditions of grants. These will usually be where assurance cannot be obtained on the regularity of grant expenditure. Further details on the assurance requirements of the Research Councils can be found at www.rcuk.ac.uk/assurance.

If the final report or the financial expenditure statement is not received within the period allowed, the research council may recover 20% of expenditure incurred on the grant. All payments may be recovered if the report or statement is not received within 6 months of the end of the grant.

In relation to the current Quality Assurance and validation project for TRAC implementation in universities, the Research Councils reserve the right to apply sanctions of 75% of the non-compliant rate where an institution is found to be using rates which are materially inaccurate (>10% variance on any single rate). These sanctions would only apply to future applications although Councils may exercise a higher sanction where there has been evidence of significant overpayments to research organisations based on inaccurate rates.

GC 20 Public Engagement

It is the responsibility of the Research Organisation and the Grant Holder and Co-Investigators to communicate the research to the public at both local and national level, and to raise awareness of the role of science and research in any related issues of public interest. Special schemes exist in some Research Councils providing additional support for these activities.

GC 21 Exploitation and Impact

It is the responsibility of the Research Organisation, and all engaged in the research, to make every reasonable effort to ensure that the outcomes obtained in the course of the research, whether patentable or not, are used to the advantage of society and the economy. Research outcomes should be disseminated to both research and more widespread audiences - for example to inform potential users and beneficiaries of the research.

Unless stated otherwise, the ownership of intellectual property, and responsibility for its exploitation, rests with the organisation that generates it.
Where the grant is associated with more than one research organisation and/or other project partners, the basis of collaboration between the organisations, including ownership of intellectual property and rights to exploitation, is expected to be set out in a formal collaboration agreement. It is the responsibility of the Research Organisation to put such an agreement in place before the research begins. The terms of collaboration agreements must not conflict with the Research Councils’ terms and conditions.

Arrangements for collaboration and/or exploitation must not prevent the future progression of research and the dissemination of research results in accordance with academic custom and practice. A temporary delay in publication is acceptable in order to allow commercial and collaborative arrangements to be established.

The Research Council may, in individual cases, reserve the right to retain ownership of intellectual property (or assign it to a third party under an exploitation agreement) and to arrange for it to be exploited for the national benefit and that of the Research Organisation involved. This right, if exercised, will be set out in an additional grant condition.

Where the exploitation of research generates revenue, there should be suitable recognition and return to the Research Organisation and individuals. The Research Organisation must ensure that all those associated with the research are aware of, and accept, these arrangements.

**GC 22 Research Monitoring and Evaluation**

While it is the responsibility of the Research Organisation to manage the research, the Research Council reserves the right to call for periodic information on progress or to visit the project team. The Grant Holder may also be asked to attend meetings to exchange information and ideas with others undertaking research in the same or similar fields.

The Grant Holder must make all reasonable efforts, if so invited, to respond to requests for information or to attend events or activities organised by the Research Council concerning the research undertaken. Such events may be held after a grant has finished.
GC 23 Publication and Acknowledgement of Support

The Grant Holder should, subject to the procedures laid down by the Research Organisation, publish the results of the research in accordance with normal academic practice. Publications and other forms of media communication, including media appearances, press releases and conferences, must acknowledge the support received from the Research Council, quoting the grant reference number if appropriate.

Journal publications should acknowledge the funding source using the standard format agreed by funders and publishers and detailed in the additional information accompanying this grant.

GC 24 Disclaimer

The Research Councils accept no liability, financial or otherwise, for expenditure or liability arising from the research funded by the grant, except as set out in these terms and conditions, or otherwise agreed in writing.

Where studies are carried out in an NHS Trust, the Trust has a duty of care to its patients. The Research Council does not accept liability for any failure in the Trust’s duty of care, or any negligence on the part of its employees.

The Research Councils reserve the right to terminate the grant at any time, subject to reasonable notice and to any payment that may be necessary to cover outstanding and unavoidable commitments.

Further to GC3, the Research Councils reserve the right to amend the payment profile at their discretion. The Research Organisation will be advised, in advance, of any such a change. Changes to payment profiles may affect the overall value of the grant.

If a grant is terminated or reduced in value, no liability for payment or redundancy or any other compensatory payment for the dismissal of staff funded by the grant will be accepted, but, subject to the provisions of GC16, negotiations will be held with regard to other contractual commitments and concerning the disposal of assets acquired under the research grant.
GC 25 Status

These terms and conditions will be governed by the laws of England and Wales; all matters relating to the terms and conditions will be subject to the exclusive jurisdiction of the courts of England and Wales.

If any provision of these terms and conditions is found by a court or other legitimate body to be illegal, invalid or unreasonable, it will not affect the remaining terms and conditions which will continue in force.

These terms and conditions, together with any additional conditions set out in the grant, contain the whole agreement between the Research Council and the Research Organisation in relation to the stated research grant. The Research Council and the Research Organisation do not intend that any of these terms and conditions should be enforceable by any third party.
ADDITIONAL INFORMATION TO ACCOMPANY TERMS & CONDITIONS

Following discussions between the Research Information Network, Research Councils, other funders and journal publishers, a standard format has been agreed for acknowledging funders in journal articles. This is to enable improved tracking of the publications generated by funded research projects.

For articles published in journals, or deposited in institutional or subject-based repositories, the acknowledgement of funding should take the form of a sentence as in the following example, with the funding agency written out in full, followed by the grant number in square brackets:

This work was supported by the Medical Research Council [grant number xxxx].

Multiple grant numbers should be separated by comma and space. Where the research was supported by more than one agency, the different agencies should be separated by a semi-colon, with "and" before the final funder. For example:

This work was supported by the Wellcome Trust [grant numbers xxxx, yyy]; the Natural Environment Research Council [grant number zzzz]; and the Economic and Social Research Council [grant number aaaa].
